

9 February 2021

Dear Parent and Carers

Please accept my apologies but I made a mistake by including the Spaghetti Bridge Maths Challenge in the list that I sent home. This was meant to be for students on site as we are providing the spaghetti for them. We certainly wouldn't want you to have to go out specially to purchase spaghetti for Wednesday and were therefore supposed to include this attachment, which encourages our students to use recycled items to make their bridge in place of spaghetti. If you happened to have lots of spaghetti at home, then please feel free to decide which is best for you.

I have also added this to SMHW to make sure that everyone has the information.

I hope that this helps.

Enjoy No Screen Day tomorrow.

Many thanks,

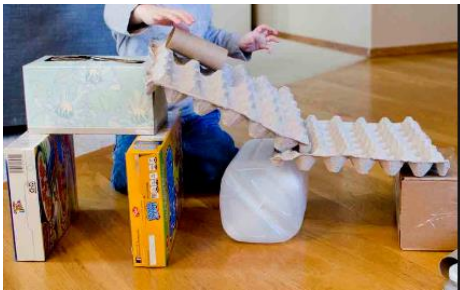

Mr Beere
Assistant Headteacher

Bridge challenge

The Maths Department would like you to design and create a bridge using anything you have lying around at home including items you may have from your recycle bin!

Think about bridge designs and what makes the strongest bridge. Design your bridge on paper first before building.

What size gap can your bridge cover?

How much weight can it hold?

Once created, please send a picture to your Maths teacher.
